

■ PATRIOT PLATFORM

FULL TRANSPARENCY & DATA SAFETY ASSESSMENT

■■ Significant Transparency Gaps Identified

Published by: JAOC Investigations

Date: 5 September 2026

Status: ■■ Significant Transparency Gaps Identified

■ PLATFORM PROFILE

Platform Name	Patriot Platform
Founder / Public Face	Daniel Thomas (known as Danny Tommo)
Background	Former tank driver, King's Royal Hussars — medically discharged before active service. Co
Legal Status	■ Unincorporated Association — NOT registered as a company, charity, or CIC
ICO Registration	■ Not found — cannot be verified
Privacy Policy	■ Placeholder only — minimal content at /blank
Registered Address	■ Not disclosed

■ DATA COLLECTION — WHAT IS BEING ASKED

The Patriot Platform website (patriotplatform.co.uk) invites visitors to register with the statement: 'Tell us who you are and where you are based.' The specific data fields requested have been reported by multiple sources as follows:

Data Item	Requested?	Risk Level
Full Name	■ Yes	Standard
Email Address	■ Yes	Standard
Date of Birth	■■ Reported requested	High — not needed for membership
Full Home Address / Postcode	■■ Reported requested	High — location data
Phone Number	■■ Reported requested	Medium

Additional personal details ■■ Unclear — reports of further profiling	Unknown
---	---------

■■ **OBSERVATION:** Requesting date of birth + full address is significantly more personal data than is required to join a community group. Under GDPR, there must be a clear, stated legal basis for collecting this level of personal information — and it must be explained at the point of collection. No such explanation is currently provided.

■ FUNDING & FINANCIAL TRANSPARENCY

Question	Answer / Status
Income sources disclosed?	■ No — donations, merchandise, events, or other sources not broken down
Bank account ownership?	■ Unclear — personal account or separate organisation account? Not stated
Full accounts published?	■ Not published — no legal requirement as unincorporated association
External funders disclosed?	■ Unknown — no transparency on third-party funding
Spending breakdown?	■ Not provided — travel, events, tech, other costs not itemised
Receipts provided?	■ Unconfirmed — no stated public policy

■■ **KEY POINT:** Because it is not a registered company or charity, there is no legal obligation to publish accounts, disclose income, or audit spending. This is a significant transparency gap — not because anything is proven wrong, but because the public has no way of knowing where the money comes from or where it goes.

■ GDPR & DATA PROTECTION — WHAT IS MISSING

■ LEGAL REQUIREMENT	■ CURRENT STATUS
1. Named Data Controller — clear legal person responsible	■ No named individual or legal entity identified
2. Clear Privacy Policy BEFORE data is collected	■ Placeholder only — minimal policy visible at /blank
3. Purpose of each data item explained — why DOB? Why address?	■ No explanation provided
4. ICO Registration — mandatory for processing personal data	■ Cannot be verified — no registration number displayed
5. Data retention period — how long is data kept?	■ Not stated
6. Right to access & delete data — clear process	■ Not explained
7. Third-party sharing statement — who else sees the data?	■ Not disclosed — cannot assume it remains private
8. Age / child protection policy — who can join?	■ Not stated

■■ **LEGAL ASSESSMENT:** Multiple core GDPR requirements are not visibly met. This does not automatically mean the law is being broken — but it means the information required by law is not being provided to the public. Until these are published, users cannot give informed consent — a fundamental principle of data protection law.

■■ CONTEXTUAL CONSIDERATIONS — NOT ACCUSATIONS, BUT RELEVANT

Factor	Note
Unincorporated status	No independent oversight, no audit requirement, no legal separation between founder and org
Past conviction	Public record — relevant to assessing leadership but does not prove current wrongdoing
Data request scope	DOB + address + personal details matches the level of detail intelligence agencies seek in bulk
No transparency on funding	Without accounts, there is no way to verify the source of income — public or private, domestic
Precedent	UK intelligence agencies have a documented history of creating or exploiting groups to gather

■■ IMPORTANT — THE INFERENCE, NOT THE ACCUSATION:

We are NOT stating this IS an intelligence operation. We ARE stating:

- Intelligence agencies CAN and HAVE operated through opaque groups — public record
- Current law allows authorities to compel data from ANY organisation — without user notification
- This platform collects personal data without full transparency — creating the very risk the law is designed to prevent
- Therefore — full transparency is the ONLY way to remove reasonable doubt.

The reasonable question is not 'Is this state-run?' — it is 'Why are the basic legal protections missing?' — and until they are provided, people have a right to be cautious.

■ SUMMARY — RED FLAGS & RECOMMENDATIONS

Category	Finding
Transparency	■ Major gaps — no named leadership, no registered entity, no physical address
Data Protection	■■ Multiple GDPR requirements not visibly met — high-risk data fields requested
Funding	■ Zero transparency — no income, no spending, no audit
Legal Compliance	■■ Cannot confirm compliance with basic legal obligations
Public Risk	■■ Users are asked to provide personal data without the information required to give informed

■■ ADVICE TO THE PUBLIC

If you are considering joining or supporting this platform:

- ■ Do NOT share your date of birth or full home address until a clear privacy policy and ICO registration are provided
- ■ Do NOT make financial donations until income sources and spending are publicly disclosed
- ■ Do NOT assume your data is protected or private — no clear assurances exist
- ■ Ask the questions listed in our Transparency Checklist — and wait for clear answers before committing
- ■ If they refuse to answer — that IS the answer — transparency is a choice, not a burden

■ WHAT WOULD IMPROVE THIS RATING

These simple steps would immediately address the major concerns and build public trust:

1. ■ Publish full real names of those running the platform
2. ■ Register as a legal entity (Company, CIC, or Charity)
3. ■ Publish a full GDPR-compliant privacy policy — BEFORE sign-up
4. ■ Register with the ICO and display the registration number
5. ■ Publish a simple breakdown of income and spending
6. ■ Explain exactly why date of birth and address data are necessary — or stop requesting them

Published by JAOC Investigations — 5 September 2026

This assessment reflects publicly available information. It is not a finding of wrongdoing — it is a record of what information IS and IS NOT publicly disclosed. If representatives of Patriot Platform wish to provide the missing information, we will update this assessment accordingly.

"Transparency is not an attack. It is the baseline of trust. If you have nothing to hide — there should be nothing to hide."
